NGUYỄN NHƯ ĐỨC

Software Engineer / Full-Stack Developer

Phone: 0964568966 **Email:** ducnguyennhu410@outlook.com **Location:** Dong Da, Ha Noi **YOB:** 1999

PROFESSIONAL SUMMARY

Software Engineer with 3.5 years of experience in full-stack web development, specializing in ASP.NET Core applications and modern JavaScript frameworks (Angular, ReactJS, VueJS). Proven track record of achieving a 98% on-time project completion rate while introducing optimized workflows and API architectures. Experienced in building enterprise CRM/ERP suites, banking hardware management platforms, and transit tracking systems.

EDUCATION

Hanoi University of Science and Technology (HUST) 2018 – 2024

School of Information and Communication Technology — Degree: Computer Engineer (Kỹ sư CNTT)

TECHNICAL SKILLS

Languages:	C#, JavaScript, TypeScript, HTML5, CSS3
Frameworks & Tech:	.NET Core, ASP.NET Boilerplate, Angular, ReactJS, VueJS, Next.js
Databases:	PostgreSQL, Microsoft SQL Server, MySQL, MongoDB
Tools & Architecture:	RESTful API, GraphQL, Webservice, JSON/XML, Git, GitHub, IIS Manager
Soft Skills & English:	Proficient English, problem-solving, self-study, cross-team collaboration

WORK EXPERIENCE

Tri Nghia Technology, Trading and Service Co., Ltd. 02/2025 – 07/2026

Software Developer

- **Full-Stack Development:** Engineered and optimized core enterprise modules (CRM, Sales, Purchase Orders, Inventory, Accounting, HR, Project Management) for TNM 3.0 platform using .NET Core, Angular, and PostgreSQL.
- **Workflow Digitization:** Designed RESTful APIs and responsive UI components to standardize operational workflows for small and medium enterprises.
- **Agile Collaboration:** Active contributor in sprint planning, code reviews, and module integration in a 10-member software engineering team.
- **Quality Assurance:** Executed system testing, resolved critical bugs, and conducted User Acceptance Testing (UAT) to guarantee high-quality client delivery.

Navistar Technology Research and Development JSC 01/2023 – 01/2025

Web Developer (01/2024 – 01/2025) **| Web Developer Intern** (06/2023 – 01/2024)

- **Front-End Engineering:** Developed and maintained front-end money counting machine management systems using VueJS with TypeScript.
- **Back-End Development:** Built and maintained backend services for device management platforms using ASP.NET Boilerplate and SQL Server.
- **Deployment & Infrastructure:** Managed production deployments of full-stack web applications on IIS Server.
- **Process Improvement:** Collaborated with department head to refine internal workflows and enhance Cloud department operations.

HIGHLIGHTED PROJECTS

Cambridge English Exam Management (OEA English) **.NET Core** **Angular** **PostgreSQL** Role: Full-Stack Developer

• **Description:** Software managing exam creation, candidate registration, schedule assignment, and results. Integrated dynamic QR code payment via Sepay.
• **Key Contributions:** Developed core operational modules and supported the final system delivery phase.

TNM 3.0 Enterprise Management Software `.NET Core` `Angular` `PostgreSQL` Role: Full-Stack Developer

• **Description:** Integrated ERP system digitizing operational processes (CRM, Sales, Inventory, Accounting, HR, Project Management) for enterprise clients.
• **Key Contributions:** Built key functional modules and assisted with acceptance testing.

Bank Cash Deposit Machine (CDM) Management (Vietinbank) `.NET Core` `VueJS` `SQL Server` Role: Full-Stack Developer

• **Description:** Enterprise system tracking real-time status, cash flows, and transaction logs across CDM devices in Hanoi and Da Nang branches.
• **Key Contributions:** Implemented hardware monitoring and reporting modules to track operational cash activity.

Car Route Management & Tracking (Cash Escort Car System) `ReactJS` `.NET Core` `SQL Server` Role: Full-Stack Developer

• **Description:** Real-time journey tracking and fleet management software for cash transit vehicles and security personnel with alert management.
• **Key Contributions:** Designed and implemented management modules for vehicle routes, escort personnel, and security permissions.
